

# Sketching Parametric Curves

---

Input interpretation:

$\theta$	0	$\frac{\pi}{4}$	$\frac{\pi}{2}$	$\frac{3}{4}\pi$	$\pi$	$\frac{5}{4}\pi$	$\frac{3}{2}\pi$	$\frac{7}{4}\pi$	$2\pi$
$x$									
$y$									

---

## Test Your Understanding

---

[Textbook] Draw the curve given by the parametric equations  $x = 2t$ ,  
 $y = t^2$ , for  $-1 \leq t \leq 5$ .
