Core Pure 1

Chapter 3: Series

Chapter Overview

- 1. Sum of 1's and Integers
- 2. Breaking down summations
- 3. Sum of Square and Cubes
- 4. Dealing with bounds

4.3	Understand and use formulae	For example, students should be able to
	for the sums of integers, squares and cubes and use these to sum other series.	sum series such as $\sum_{r+1}^{n} r(r^2 + 2)$

Starter

Write out the following series:

$$1. \sum_{r=1}^{n} r$$

$$2.\sum_{r=1}^{\infty} r$$

3.
$$\sum_{r=1}^{n} (2r-1)$$

4.
$$\sum_{r=0}^{n-1} (2r+1)$$

5.
$$\sum_{r=1}^{n} (k^2 + 2)$$

Calculate:

1.
$$\sum_{p=3}^{8} p^2$$

2.
$$\sum_{r=0}^{5} (7r+1)^2$$

The Sum of 1, n times

Example:

$$\sum_{r=1}^{n} 3$$

Test your Understanding:

$$1.\sum_{r=1}^{6} 1$$

$$2.\sum_{r=1}^{7} 3$$

$$3.\sum_{r=4}^{n} 1$$

The sum of the first n natural numbers

Examples:

Evaluate

$$1a.\sum_{r=1}^{100} r$$

$$1b. \sum_{r=50}^{100} r$$

Test Your Understanding:

Evaluate:

$$1a.\sum_{r=1}^{50} r$$

$$1b.\sum_{r=21}^{50} r$$

Further Examples:

1. Evaluate
$$\sum_{r=1}^{4} (2r - 1)$$

2. Show that

$$\sum_{r=5}^{2N-1} r = 2N^2 - N - 10$$

(for $N \ge 3$)

3. Show that
$$\sum_{r=k-1}^{2k} r = \frac{(k-2)(3k-1)}{2}$$
 , $\, k \geq 1$

Test Your Understanding:

Show that
$$\sum_{r=n}^{3n} r = 2n(2n+1)$$

Breaking up Summations

Prove that $\sum_{r=1}^{n} kr = k \sum_{r=1}^{n} r$, where k is a constant.

Examples:

$$1.\sum_{r=1}^{n} 3r$$

$$2.\sum_{r=1}^{n} 4$$

Prove that
$$\sum_{i=1}^{n} (a_i + b_i) = \sum_{i=1}^{n} a_i + \sum_{i=1}^{n} b_i$$

Combining the previous 2 statements leads to the following result:

$$\sum_{r=1}^{n} (ar + b) = a \sum_{r=1}^{n} r + b \sum_{r=1}^{n} 1$$

Examples

$$1.\sum_{r=1}^{25} (3r+1)$$

2. Show that
$$\sum_{r=1}^{n} (3r+2) = \frac{n}{2} (3n+7)$$

Hence evaluate $\sum_{r=20}^{50} (3r+2)$

Test Your Understanding

1. Show that $\sum_{r=1}^n (7r-4) = \left(\frac{n}{2}\right)(7n-1)$ and hence evaluate $\sum_{r=20}^{50} (7r-4)$
