

2.4) Variance and standard deviation

Worked example

Calculate the variance and standard deviation:

2, 3, 4, 5, 6

Your turn

Calculate the variance and standard deviation:

2, 3, 4, 5, 7

$$\text{Variance} = \sigma^2 = 2.96$$

$$\text{Standard deviation} = \sigma = 1.72 \text{ (3 sf)}$$

Worked example

Calculate the variance and standard deviation:

2, 3, 4, 5, 6

Your turn

Calculate the variance and standard deviation:

4, 6, 8, 10, 12

$$\text{Variance} = \sigma^2 = 8$$

$$\text{Standard deviation} = \sigma = 2.83 \text{ (3 sf)}$$

Worked example

Calculate the variance and standard deviation:

2, 4, 6, 8, 10

Your turn

Calculate the variance and standard deviation:

1, 2, 3, 4, 5

$$\text{Variance} = \sigma^2 = 2$$

$$\text{Standard deviation} = \sigma = 1.41 \text{ (3 sf)}$$

Worked example

Calculate the variance and standard deviation:

Score	Frequency
0	3
1	2
2	1
3	1
4	4

Your turn

Calculate the variance and standard deviation:

Score	Frequency
0	6
1	4
2	2
3	2
4	8

$$\text{Variance} = \sigma^2 = 2.81 \text{ (3 sf)}$$

$$\text{Standard deviation} = \sigma = 1.68 \text{ (3 sf)}$$

Worked example

Estimate the variance and standard deviation:

Score, x	Frequency
$0 \leq x < 1$	8
$1 \leq x < 2$	2
$2 \leq x < 4$	1
$4 \leq x < 9.5$	1
$9.5 \leq x < 10$	4

Your turn

Estimate the variance and standard deviation:

Score, x	Frequency
$0 < x \leq 1$	6
$1 < x \leq 3$	4
$3 < x \leq 6$	2
$6 < x \leq 6.5$	2
$6.5 < x \leq 10$	8

$$\text{Variance} = \sigma_x^2 \approx 10.9 \text{ (3 sf)}$$

$$\text{Standard deviation} = \sigma_x \approx 3.30 \text{ (3 sf)}$$

Worked example

Times, x , have been rounded to the nearest minute. Estimate the variance and standard deviation:

Time, x	Frequency
0 – 2	5
3 – 5	2
6 – 10	3

Your turn

Times, x , have been rounded to the nearest minute. Estimate the variance and standard deviation:

Time, x	Frequency
0 – 3	7
4 – 8	11
9 – 10	2

$$\text{Variance} = \sigma_x^2 \approx 5.81 \text{ (3 sf)}$$

$$\text{Standard deviation} = \sigma_x \approx 2.41 \text{ (3 sf)}$$

Worked example

Work out how many people had a score more than one standard deviation below the mean

Score	Frequency
0	3
1	2
2	1
3	1
4	4
5	9
6	5

Your turn

Work out how many people had a score more than one standard deviation above the mean

Score	Frequency
0	6
1	4
2	2
3	2
4	8
5	18
6	10

10

Worked example

The scores, x , were recorded for 20 people.

The summary data is:

$$S_{xx} = 235$$

Calculate the standard deviation

Your turn

The scores, x , were recorded for 40 people.

The summary data is:

$$S_{xx} = 532$$

Calculate the standard deviation

$$\sigma_x = 3.65 \text{ (3 sf)}$$

Worked example

The scores, x , were recorded for 20 people.

The summary data is:

$$\sum x = 34, \sum x^2 = 567$$

Calculate the mean and standard deviation.

Your turn

The scores, x , were recorded for 40 people.

The summary data is:

$$\sum x = 76, \sum x^2 = 543$$

Calculate the mean and standard deviation.

$$\text{Mean} = \bar{x} = 1.9$$

$$\text{Standard deviation} = \sigma_x = 3.16 \text{ (3 sf)}$$

Worked example

The scores, x , were recorded for 20 people.

The summary data is:

$$\sum x = 34, \sum x^2 = 567$$

The highest score was 8.5.

The lowest score was 0.2.

Estimate the number of scores which were greater than one standard deviation above the mean.

Your turn

The scores, x , were recorded for 40 people.

The summary data is:

$$\sum x = 76, \sum x^2 = 543$$

The highest score was 5.8.

The lowest score was 0.3.

Estimate the number of scores which were greater than one standard deviation above the mean.
