

6.1) Midpoints and perpendicular bisectors

Worked example

Find the midpoint of the line segment between:

$$(2, 4) \text{ and } (8, 8)$$

$$(-2, 4) \text{ and } (-9, 9)$$

Your turn

Find the midpoint of the line segment between:

$$(2, -4) \text{ and } (11, 8)$$

$$(6.5, 2)$$
