Prove It – Adding and Subtracting Fractions - Answers

What can you do after this lesson?

What went well…	Prove it…
I can add and subtract fractions by using a common denominator.	$\frac{3}{4} - \frac{2}{5} = \frac{7}{20}$
I can add and subtract fractions in a real-life setting.	Susan, Terry and Victor win some money in a competition. Susan takes $\frac{4}{7}$ of the prize, Terry takes $\frac{1}{4}$ of the prize and Victor keeps the rest. What fraction does Victor keep? $\frac{5}{28}$
I can add and subtract mixed numbers.	$3\frac{2}{3} + 1\frac{4}{5} = 5\frac{7}{15}$
