

## Prove It - Adding and Subtracting Fractions

What can you do after this lesson?

What went well...	Prove it...
I can add and subtract fractions by using a common denominator.	$\frac{3}{4} - \frac{2}{5}$
I can add and subtract fractions in a real-life setting.	Susan, Terry and Victor win some money in a competition. Susan takes $\frac{4}{7}$ of the prize, Terry takes $\frac{1}{4}$ of the prize and Victor keeps the rest. What fraction does Victor keep?
I can add and subtract mixed numbers.	$3\frac{2}{3} + 1\frac{4}{5}$
